MEET the ozobot

WHAT IS IT?
Ozobot is a miniature robot that follows your commands.

WHAT DOES IT DO?
- Ozobot follows lines
- Ozobot can see colors
- Ozobot follows your commands
- Ozobot can race and even dance!

HOW DOES IT WORK?
There are five sensors on the bottom of Ozobot. These are Ozobot’s eyes.

Ozobot’s eyes can read colour code commands that look like this:

![Colour Code Commands]

HOW DO I GET STARTED?
All you need to start using Ozobot is a set of coloured markers, some paper and your imagination! Draw a path, switch Ozobot on and watch it go!

WHAT IF I GET STUCK?
Part of the fun of Ozobot is trying things a few times until you get them to work the way you want. If you need help, you can reset Ozobot and start over. Try searching YouTube for lots of helpful Ozobot videos.
